

Waste Heat Recovery
Potential Locations
October, 2015

This list below represents those compressor units on **Algonquin Gas Transmission, LLC** that meet or closely meet the economic criteria set out in the INGAA White Paper on Waste Heat Recovery of at least 15,000 horsepower operating at or more than a 60% load factor rate.

Algonquin Gas Transmission, LLC currently does not have any compressor stations that meet the criteria specified above. Algonquin Gas Transmission, LLC will review this on a regular basis and update this as facility changes and technology enhancements dictate.
